

Vermont Early Childhood Career Ladder

Level I

LEVEL I LEVEL II LEVEL III LEVEL IV LEVEL V LEVEL VI

What is the Career Ladder?

The Career Ladder identifies the six career levels of professional development in the field of early childhood care and education. It serves as a basis for tracking and planning your professional growth. You may enter the Career Ladder at any level, and there are many different paths to take to develop your career. Each level combines education and experience. The Northern Lights core competencies provide the foundation for this system.

Who should begin at Level I?

Individuals who are beginning to work in the early childhood field, or those who have worked in this field for a long time but do not have a related certificate or credential, should consider a Level I certificate.

How do I apply for a Level I certificate?

Submit a completed Level I application to Northern Lights. Include documentation of: 1) at least one year experience working with young children in a group; 2) a current Individual Professional Development Plan (IPDP); 3) documentation of successful completion of any one of these three education options:

- *Fundamentals for Early Childhood Professionals* course, OR
- One college course (3 credits) in (early) child development *plus* two workshops: *Basic Specialized Care*, and *Introduction to Child Care Licensing* and one approved observation of you working with children OR
- Northern Lights approved portfolio with 45 hours of verified training

Why is completing Level I important?

As you work toward a Level I certificate you gain valuable training. When you receive it you are recognized for your accomplishment and commitment. You may also be eligible for a Recognition Bonus from the Child Development Division. The Step Ahead Recognition System (STARS) also recognizes Level certificates. For staff new to the field, Vermont Early Childhood Program Licensing Regulations require successful completion of Level I within one year of employment.

"The Fundamentals Course really helped me grow as a child care provider."

Vermont Early Childhood Career Ladder Level I (continued)

Fundamentals for Early Childhood Professionals

This 45-hour course helps you achieve Level I. It is based on the Level I core knowledge and competencies for early childhood professionals and covers the following topics:

- observation of children
- health and safety
- planning learning environments
- professionalism and program organization
- child development: infants to preschoolers
- connecting to families and communities
- child care regulations & Basic Specialized Care
- including children with diverse needs

This course gives you a chance to reflect on your work with children, to apply what you learn in class to the children you care for, and meet and learn from other professionals.

Where is the course offered and how much is it?

The *Fundamentals* course is offered annually in each region of Vermont by the community child care support agencies. Course fees vary by region. The courses are listed in the Bright Futures Information System (BFIS) Course Calendar.

What is the Northern Lights approved portfolio?

One way to complete the education requirement for Level I is to create a portfolio with: 1) documentation that you have completed 45 hours of training across the five Core Knowledge Areas (including *Basic Specialized Care* and *Introduction to Child Care Regulations*); 2) documents that show what you know and how you use the Level I core competencies; and 3) documentation of when you were observed teaching. The portfolio is then reviewed and approved. This option is useful if you have not taken college courses, have collected many hours of training over the years and like to write and organize your learning. You must contact Northern Lights before you plan to apply.

What is the required Observation?

No matter which option you use to complete the education requirement for Level I, you will need to be observed by an experienced mentor while you are working with children. Your local Resource Development Specialist can help you find the person to do this observation. The observer gives you supportive feedback about what she or he sees.

Did you know...?

The *Fundamentals for Early Childhood Professionals* -

- can be the first step toward a Child Development Associate Credential (CDA)
- includes the training to become a Basic Specialized Care provider
- helps you learn how to create your Individual Professional Development Plan (IPDP)
